"All we have to decide is what to do with the time that is given to us."

Summary

I have 7+ years experience on parallel and distributed systems focusing on low level development. With my experience, I learned to tackle several tasks to improve problem-solving skills, and increase my knowledge about tools and technologies. In each of those years, I developed and increased my love for challenging tasks and the knowledge that comes with every task solved.

Work Experience

Universidade Federal de Santa Catarina (UFSC)   *Florianópolis, SC*

RESEARCH AND DEVELOPMENT ENGINEER   *Feb. 2015 - Aug. 2018*

- Developed a parallel framework port that focus on CPU and GPU computation to a low-power processor in C++ and a proprietary processor library.
- The ported framework enabled a lower power consumption in comparison with general processors.

Universidade Federal de Santa Catarina (UFSC)   *Florianópolis, SC*

RESEARCH AND DEVELOPMENT ENGINEER   *Feb. 2019 - Nov. 2022*

- Developed a methodology to mimic memory accesses from an application running on a host SO.
- Applied the methodology in a distributed OS running on a high performance and low power consumption processor.
- The methodology was able to mimic the behavior of applications on the distributed OS even without the needed support.
- This project was developed in Python and C.

Université Grenoble Alpes (UGA)   *Grenoble, France*

RESEARCH AND DEVELOPMENT ENGINEER   *Sept. 2019 - Nov. 2019*

- Improved the developed methodology in a rich environment with authorities in the High Performance Computing area.

Honors & Awards

2021	**Finalist**, 16th Marathon of Parallel Programming	*Belo Horizonte, MG*
2018	**Bachelor Honors Degree**, Universidade Federal de Santa Catarina (UFSC)	*Florianópolis, SC*
2017	**Best scientific initiation work in Departamento de Informática e Estátistica (INE)**, Seminário de Iniciação Científica e Tecnológica da UFSC (SIC-UFSC)	*Florianópolis, SC*
2017	**Second Place**, 12th Marathon of Parallel Programming	*Campinas, SP*

Presentations

36th ACM/SIGAPP Symposium On Applied Computing (SAC)
Virtual Conference

PRESENTER FOR A TRACE-DRIVEN METHODOLOGY FOR DISTRIBUTED OSES
Mar. 2021

- Introduced core concepts about High Performance Computing and power consumption.
- Discussed distributed OSes and how they improve High Performance Computing environment.
- Presented a methodology proposal to solve problems inside this context.

18th Simpósio de Sistemas Computacionais de Alto Desempenho (WSCAD)
Campinas, SP

PRESENTER FOR POWER EFFICIENT APPLICATIONS EXECUTION FOR A LIGHTWEIGHT MANYCORE
Oct. 2017

- Introduced core concepts about High Performance Computing and power consumption.
- Discussed about frameworks for application execution.
- Presented an improvement on a framework to achieve better power efficiency.

17º Escola Regional de Alto Desempenho do Estado do Rio Grande do Sul (ERAD/RS)

TEACHING ASSISTANT ON PARALLEL AND DISTRIBUTED PROGRAMMING CLASS

<div align="right">Feb. 2019 - Jul. 2019</div>

- Helped the teacher with the creation and review of documents, and presentations for the class.
- Helped on the creation of several problems for the students.
- Answered conceptual questions from students, and helped them with bugs and questions.
